Relay

After a scam, prepare the next step

Organize the facts. Review the proposed plan. Prepare a report you can submit yourself.

Development demo: https://work-511514.web.app

The person Relay helps

Someone who has just transferred money after an impersonation scam

The immediate job

Record what happened and prepare accurate information for the right recipient.

The output

A reviewable account, source-linked plan and downloadable report.

The core demonstration

01

Tell us

Describe the fictional incident in plain language.

02

Confirm

Check amount, payment method and statement.

03

Plan

Review the suggested contact order and cited draft guidance.

04

Prepare

Review a checked report, then copy or download the PDF.

Google Cloud architecture

Browser

React on Firebase Hosting
Firebase Auth and App Check

Application

Cloud Run API and private worker
Firestore and private Cloud Storage
Pub/Sub background jobs

AI and domain checks

Gemini through Google GenAI SDK and ADK workflows. Typed contracts, source references, version checks and report verification.

User control and simulation boundaries

User control

Confirm facts before use
Review the current report version
Submit through the listed recipient channel
Explicit approval for simulated delivery

Demonstration boundaries

Synthetic data only
Bank, police and payment actions simulated
Guidance remains visibly unreviewed
No recovery or official acceptance claim

Evidence and remaining work

Verified for this release

91 core regression tests passed
Python and TypeScript checks passed
Hosted core flow and signed PDF passed
One live run produced 3 checked reports

Open gates

Live report reliability and model quota
Human guidance and Hindi review
Voice, Studio and linking cloud integration
Comparative model quality measurements

The deployed scope prioritizes the text journey. Advanced features remain disabled.
